

Brookrege Admin Manual

How to run the website day to day: listings, photos, inquiries, reports, the team and account security.

For staff of Brookrege, Sohag · Admin address: <https://admin.brookrege.com> · Version 1.0 (Phase 4, September 2026)
Questions about this manual or the system: the technical contact listed in docs/security/INCIDENT-RESPONSE.md.

CONTENTS

What's in this manual

1 Roles: who can do what

2 Signing in and two-step verification

3 Overview

4 Listings: add, publish, renew, sell

5 Photos and video

6 Media library

7 Inquiries

8 Property submissions

9 Regions, compounds & projects

10 Analytics & reports

11 Team

12 Notifications (email and SMS)

13 Security

14 Privacy requests

15 My account

16 Activity log

17 Daily and weekly routine

18 When something goes wrong

19 بطاقة مختصرة بالعربية

How to read it. Words in **green** are exactly what you see on the screen (buttons, tabs, fields). Each chapter starts with a label saying which roles can use that screen. If a menu item is missing for you, your role doesn't include it.

Roles: who can do what

Every staff member has one of three roles. A super admin sets it in **Team**. The menu on the left only shows what your role allows.

What	Super admin	Content admin	Moderator
See listings, the overview, the media library	Yes	Yes	Yes
Publish, renew, take offline, mark as sold	Yes	Yes	Yes
Add and edit listings, upload photos	Yes	Yes	No
Delete listings	Yes	Yes	No
Regions, compounds & projects	Yes	Yes	View only
Inquiries and property submissions (view and update)	Yes	Yes	Inquiries yes; submissions view only
Analytics & reports	Yes	Yes	No
Team, Notifications, Security, Privacy, Activity log	Yes	No	No

On the Team screen the roles are described as: **Super admin** — “Everything, including team and activity log”; **Content admin** — “Listings, photos, compounds, leads — no team or system settings”; **Moderator** — “View listings, renew or take them offline, handle inquiries — no editing or deleting”.

Keep super admins few. Two people is enough: the owner and one trusted manager. Everyone else works as a content admin or moderator.

Signing in and two-step verification

Signing in

1. Open **https://admin.brookrege.com**. You see **Sign in to Brookrege admin**.
2. Enter your **Email** and **Password**, click **Sign in**.
3. If two-step verification is on for you, the page changes to **Two-step verification**: type the 6-digit code from your authenticator app and click **Sign in**. No phone? Click **Use a backup code** and type one of your printed codes (each works once).

First sign-in

A super admin gives you a **temporary password** in person or by phone. After signing in you must choose your own password before you can do anything else.

Password rules

- At least **12 characters** (up to 128), with a lowercase letter, an uppercase letter, a number and a symbol.
- No common words (“password”, “admin”, “brookrege”, “sohag”...), no sequences like 12345 or qwert, no character repeated 4 times, and not your name or email.
- Tip: three unrelated words plus a number and symbol, e.g. *Nile-Tea-Window-47!* (don't use this one).

Setting up two-step verification

My account › **Two-step verification**: scan the QR code with Google Authenticator, Microsoft Authenticator or similar, type the current code to confirm. You then get **10 backup codes**: print them or keep them in a password manager, not in a photo on the same phone. It's optional for every role; a super admin can require it for everyone in **Security**.

Being signed out

- After **60 minutes without activity**, and in any case **12 hours** after signing in, you are signed out and must sign in again.
- Signing out elsewhere, a role change or a suspended account also signs you out at once.

Locked account

After **5 wrong passwords or codes in a row** the account locks for 15 minutes; every further 5 mistakes double the wait (30 min, 1 h ... up to 24 h). A super admin can unlock you early in **Team** or **Security** › **Staff accounts** › **Unlock**.

Never share your password or codes, even with a colleague or “technical support” on the phone. Brookrege staff will never ask for them. Report such a call to the owner.

Overview

The first screen after signing in. Each card is a shortcut to the matching list:

Card	What it counts
Live listings	Listings visible on the public site now.
Expiring in 14 days	Live listings that go offline within two weeks — “Renew to keep them online”.
New inquiries	Call-back requests nobody has handled yet.
New property submissions	Owners asking Brookrege to list their property.
Drafts • Expired • Sold	Listings not on the site: unfinished, past their date (“Hidden from the public site”), or sold.

Listings: add, publish, renew, sell

The life of a listing

A listing is online for **3 months** from publishing or renewing. When the date passes it disappears from the public site immediately and is marked **Expired** by the nightly job (02:00). Expired listings stay in the admin so you can renew them.

The Listings screen

Tabs: **All**, **Live**, **Expiring soon** (14 days), **Drafts**, **Expired**, **Sold**. Search with **Search by title or address**. The table shows price, status, expiry date (with “in N days” when close) and the number of leads. “— no photos” warns about listings without pictures.

Adding a listing

Click **Add listing**. Fields:

Field	Rules
Title in Arabic	Required, at least 5 characters. Shown on the Arabic site.
Title in English	Optional; the English site shows the Arabic title if empty.
Listed for	Sale or Rent . Rent is for apartments and shops only .
Property type	Apartments, Villas, Townhouses, Studios, Shops, Offices, Land.
Seller	Sales only, required: Developer or Resale .
Price (EGP)	Whole pounds; for rent it is the Monthly rent (EGP) .
Area (m²)	Required.
Bedrooms / Bathrooms	0–50. No bedrooms for shops, offices and land; no bathrooms for land.
Description in Arabic / English	Optional but strongly recommended.
Feature this listing...	Shows it at the top of results. Use for a few listings at a time.
Region / Compound	Region required. Compound optional (Not in a compound); only compounds of the chosen region appear.
Address or landmark, Latitude, Longitude	Optional. Coordinates put the listing on the map: in Google Maps right-click the spot and click the numbers to copy them.

Then click **Save and publish** (goes live for 3 months) or save as a draft to finish later.

Editing and status buttons

Open a listing to change its details (**Save changes**) and use the **Status** buttons:

Status now	Buttons
Draft	Publish for 3 months
Live	Renew for 3 months · Mark as sold · Take offline now (asks to confirm)
Expired	Renew for 3 months · Archive
Sold	Archive
Archived	Move back to drafts

Delete listing removes it from the site and the admin list; the activity log keeps a record. Prefer **Archive** — it keeps the history and reports complete.

Changes appear on the website within about a minute (the site keeps very short copies of pages to stay fast under heavy traffic).

CHAPTER 5 · CONTENT ADMINS

Photos and video

- On a listing, drag files onto **Drop photos or a video here, or click to choose**, or click **Add from media library** to reuse an existing upload.
- Accepted: **JPG, PNG, WebP up to 15 MB** each; **MP4, MOV, WebM up to 95 MB**; up to **20 files** at a time. Other files are refused with a reason.
- Photos are resized automatically (three sizes, so phones download small ones). Videos show **Preparing video...** for a few minutes while a preview frame is made.
- The first photo is the **Cover photo**; choose another with its cover button. **Remove** takes a photo off this listing (it stays in the media library).
- Good photos: daylight, landscape orientation, the best room first, no watermarks of other agencies, no people's faces or car plates.

CHAPTER 6 · EVERYONE (CHANGES: CONTENT ADMINS)

Media library

Every photo and video uploaded. Tabs: **All, Photos, Videos, Not used, Deleted**. Each file shows where it is used (*In 2 listings* or **Not used**).

- **Add description**: a short text such as “Living room with balcony”. Helps blind visitors and Google.
- **Delete**: if the file is in use you are asked whether to delete it everywhere. Deleted files can be **Restored** for **30 days**.
- Uploads never attached to a listing are cleared automatically after **7 days**.

Inquiries

People who asked to be called about a listing. Each new inquiry is also emailed to the staff list (chapter 12), and the visitor may get an SMS confirmation.

- Change the status with the drop-down on each inquiry; use **Spam** for fake requests.
- Write a **staff note** (“called, wants to visit Thursday”) — it saves when you click away.
- **Call back within one working day.** The owner sees the “median time to first response” in Analytics, and monitoring warns when many inquiries wait for more than a day.

Phone numbers and messages are personal data. Don't copy them to personal WhatsApp groups or spreadsheets; after 24 months without activity the system removes the contact details automatically.

Property submissions

Owners who used “Add your property” on the website. Statuses: **New** → **Contacted** → **Listed** or **Not suitable**. When you list it, click **Add listing**, create the listing, then set the submission to **Listed**.

Regions, compounds & projects

- **Regions (Add region):** areas of Sohag. Name in English (used in web addresses) and **Arabic name**.
- **Compounds (Add compound):** Name in English / Arabic, region, **Developer**, descriptions. Each compound gets its own page on the site listing its units and “starting from” prices.
- **Projects (Add project):** **Partnership / major project** or **Completed / sold**, with optional **Partner** and **Completed on** date. Shown on the “Our projects” page.
- A region or compound that still has listings can't be deleted; move the listings first.

Analytics & reports

Choose a period (From – to). Tabs: **Overview**, **Listings**, **Inquiries**, **Team activity**.

- **Figures:** **Listing views**, **Inquiries**, **Inquiries per 100 views**, **'Add your property' requests**, **New listings published**, **Marked sold**, **Live listings now**, **Median time to first response**, each compared with the previous period.
- **Charts:** **Views and inquiries per day**, **By property type**, and the **Most viewed listings** table.
- **Export to Excel**, or **Print / save as PDF** (the browser's print window; choose “Save as PDF”).
- **Scheduled reports** › **Add schedule:** **Weekly** (Sundays) or **Monthly** (the 1st), with recipient emails. **Stop** ends a schedule. Needs email set up (chapter 12).

Views are counted once per visitor per listing per 30 minutes; search-engine robots are not counted.

Team

1. **Add member:** **Name**, **Email**, **Role**, **Temporary password**.
 2. Give the temporary password **in person or by phone — never by email or chat**. They choose their own at first sign-in (until then the list shows **Hasn't chosen a password yet**).
- **Suspend** blocks someone at once (e.g. they left the company) and signs them out everywhere. **Restore access** undoes it.
 - The list shows **Last sign-in**, **Two-step** status and **Locked** accounts.
 - **When someone leaves:** suspend the same day, then check **Security** › **Signed in now** is clear for them.

Notifications (email and SMS)

Emails and text messages are sent automatically in the background and retried if a provider is briefly unavailable. Tabs:

- **Email:** provider **SendGrid**, **From address (verified in SendGrid)**, **From name**, and **Staff who receive new inquiries and submissions**. **Save email settings**, then **Send test**.
- **SMS:** provider **Twilio** (**Account SID**, sender or **Messaging Service SID**). Egypt requires a registered alphanumeric sender ID; Arabic messages use 70 characters per SMS segment. **Don't send — write to server log (testing)** is for testing only.
- **Messages:** the texts of each automatic email/SMS; choose one, edit, **Save template**.
- **Delivery log:** every message with **Sent**, **Failed** or **Skipped** and the error. **Background jobs:** failed jobs with **Retry**.

Provider keys are stored encrypted and shown masked; you only type them again to change them.

Security

“Who can get in, how, and what happened recently.” Tabs:

- **Overview:** anything that **Needs attention** (locked accounts, required 2FA not set up) and the **Policy** switch **Require two-step verification for everyone** (off = optional for everyone).
- **Staff accounts:** status of each person, with **Unlock**, **Reset 2FA** (when someone lost their phone and codes — check it is really them first) and **Sign out everywhere**.
- **Signed in now:** every signed-in browser; **End session** signs one out.
- **Allowed networks:** limit the admin to the office connection. Only turn this on if the office has a **fixed IP address** from its provider — most Egyptian home and mobile connections change address. **Add my current address** first, so you don't lock yourself out. Saved changes apply on all servers within 15 seconds.
- **Recent events:** sign-ins, wrong passwords, locks, 2FA changes, blocked addresses.

Emergency: if you think an account is stolen, use **Sign out everywhere** for that person, suspend them in Team, and call the technical contact. Full steps: docs/security/INCIDENT-RESPONSE.md.

Privacy requests

Egypt's Personal Data Protection Law gives people the right to know what we hold about them, get a copy, and have it removed.

1. **Check it is really them** — e.g. call back the number they gave.
2. **Requests** › **Find a person's data:** enter the **Phone (any format)** or email, **Search**. You see their inquiries, property requests and messages.
3. **Download a copy (JSON)** and send it through the channel they contacted you from.
4. To remove: **Erase this person's details**, type **ERASE**, confirm. Names, phones, emails, messages and staff notes are removed; the records stay without them so reports still add up. **This can't be undone**.

Retention: how long personal details are kept (leads: months without any update; message logs and sign-in addresses). A clean-up runs every night at 04:10; **Run the clean-up now** runs it immediately.

My account

- **Password:** change it (current password required).
- **Two-step verification:** turn on (chapter 2), **Create new backup codes** (the old ones stop working; you'll be told when you're running low), or turn off if your role allows.
- **Signed-in browsers:** every place you are signed in. **Sign out everywhere else** after using a shared or lost device.

Activity log

A permanent record of every change: who, what, when (e.g. “Published listing”, “Edited listing”, “Updated inquiry”, “Reset two-step verification”). Filter with **Everything**, **Listings**, **Inquiries** and others; **Show changes** displays before/after values. Nobody — not even a super admin — can edit or delete entries.

CHAPTER 17

Daily and weekly routine

When	Who	What
Every morning	Sales / moderators	Overview › New inquiries: call everyone back, set the status, add a note.
Every morning	Content admin	New property submissions; Expiring in 14 days → renew or mark sold.
When something sells	Anyone	Mark as sold the same day, so customers don't call about it.
Weekly (Sunday)	Owner	Read the weekly report email; check Listings › Drafts and “no photos”.
Monthly	Super admin	Team: suspend anyone who left; Security › Recent events; Notifications › Delivery log for failures.

CHAPTER 18

When something goes wrong

Problem	What to do
“Email or password is incorrect.”	Check caps lock and the email. After 5 tries the account locks — ask a super admin to unlock.
Lost phone with the authenticator	Sign in with a backup code, then set up 2FA again. No codes: a super admin uses Reset 2FA .
Signed out unexpectedly	Normal after 60 minutes idle or 12 hours. If it happens constantly, tell the super admin.
A photo was refused	The message says why: wrong type (HEIC from iPhones — set the camera to “Most compatible”), too large, or not really an image.
Listing not on the website	Is it Live and not expired? Wait a minute. Still missing: refresh with Ctrl+F5.
No inquiry emails	Notifications › Delivery log. Failures there: tell the super admin (provider key or credit).
The admin or site is down	The technical team is alerted automatically. If it lasts more than 15 minutes, call the technical contact.
A suspicious call or email asks for a password or code	Refuse, hang up, tell the owner. That's how most accounts are stolen.

بطاقة مختصرة – لوحة تحكم Brookrege

- **الدخول:** admin.brookrege.com – البريد وكلمة المرور ثم رمز التطبيق المكوّن من ٦ أرقام. بدون الهاتف: اضغط «Use a backup code».
- **كلمة المرور:** ١٢ حرفاً على الأقل، بها حرف كبير وصغير ورقم ورمز. لا تشاركها مع أحد أبداً.
- **القفل:** ٥ محاولات خاطئة تقفل الحساب ١٥ دقيقة. اطلب من المدير «Unlock».
- **إضافة عقار:** Listings ← Add listing ← املأ البيانات ← Save and publish (يظهر ٣ أشهر).
- **الإيجار:** للشقق والمحلات فقط. البيع: اختر «Developer» أو «Resale».
- **الصور:** JPG / PNG / WebP حتى ١٥ ميغا، فيديو حتى ٩٥ ميغا، حتى ٢٠ ملفاً في المرة.
- **قبل انتهاء المدة:** Renew for 3 months. عند البيع: Mark as sold في نفس اليوم.
- **الاستفسارات:** اتصل بالعميل خلال يوم عمل، غير الحالة، واكتب ملاحظة.
- **بيانات العملاء:** لا تنسخ الأرقام إلى مجموعات واتساب شخصية.
- **مكالمة أو رسالة تطلب كلمة مرور أو رمز:** ارفض وأبلغ المالك فوراً.
